ULTRA DURABLE THROUGH AND THROUGH

TESSUTI PROFONDAMENTE RESISTENTI

SUNBRELLA® FIBRES ARE STEEPED IN TOP QUALITY DYES DURING THE ACTUAL MANUFACTURING PROCESS, WHEN THE ACRYLIC IS STILL LIQUID.

As a result, Sunbrella yarn is coloured all the way to the core so its original vibrancy lasts on and on. There's absolutely no comparison to ordinary procedures whereby the yarn or fabric is simply dipped in dye which therefore only penetrates the outer layers.

I PIGMENTI DI ALTA QUALITÀ SUNBRELLA® PENETRANO NELLA FIBRA DURANTE LA PRODUZIONE, QUANDO L'ACRILICO È ANCORA LIQUIDO.

Nascono così un filo sunbrella colorato "in profondità" e un tessuto che offre una tinta dalla tenuta, resistenza e durevolezza eccezionali. un risultato senza confronto con i tessuti ordinari, il cui colore, ottenuto per semplice immersione, penetra solo nello strato superiore del filo o della tela.
